In my opinion, men and women should have the same educational opportunities. However, I do not agree with the idea of accepting equal proportions of each gender in every university subject.

Having the same number of men and women on all degree courses is simply unrealistic. Student numbers on any course depend on the applications that the institution receives. If a university decided to fill courses with equal numbers of males and females, it would need enough applicants of each gender.

In reality, many courses are more popular with one gender than the other, and it would not be practical to aim for equal proportions. Universities should continue to select best candidates for each course according to their qualifications. In this way, both men and women have the same opportunities.

Hence, the selection of university students should be based on merit, and it would be both impractical and unfair to change the selection procedure based on gender.
