

## 2. Why do we need trees?

English Teachers On Call

Boy do we all need trees! Why? Let me explain. Humans, and virtually all other critters, live on a gas called oxygen. Oxygen is one of the gases found in air and every single cell inside you needs the oxygen you inhale for energy! Sure, you also need food, but your body couldn't even make use OF the food you eat if you didn't have that oxygen.

★Teacher will ask this question first “Are there any words you don’t understand?” after explain those words, teacher will make some questions below each paragraph. And let him say the sentences according to your question. (If the student can’t make himself, you’ll make the sentences ) And let him say it 3 times to memorize it:

Please ask them to send the complete version of this material before the lesson.

so many of you have alarms in your homes, similar to smoke alarms, that are made to go off if they detect the presence of serious amounts of carbon dioxide being belched out of something such as a furnace.

★

So how come all you humans exhaling hasn't made a world filled with nothing but carbon dioxide? Because of trees. Through their leaves, trees take in carbon dioxide from the air, use it to make the sugar that is their food, and release gases they don't use back through their leaves. What don't they use?

★

Oxygen. Amazing, huh. And amazingly lucky!

So the answer is yes, yes, yes. We like trees, but even more importantly, we NEED trees. We couldn't afford to lose them!

★
